

**Eldefonso (Jun) T. Leyson, Jr.**

**Professional Summary:**

An experienced technical grouting specialist with over 15 years of diversified, hands-on construction experience, including commercial, industrial, utility, heavy civil, tunneling and mining projects.

**Education:**

BSCE - Civil, 1993 Adamson University, Philippines

**Career History:**

2003 to date Multiurethanes Ltd., Mississauga, ON  
Multiurethanes Inc., Buffalo, NY

Technical Grouting Specialist on numerous grouting projects.

2001-2003 Employed in manufacturing business

1993-2001 Civil Engineer employed by various contracting and engineering companies at construction and mining sites throughout the Philippines

**Areas of Technical Expertise:**

- Restoration of concrete structures, including high-performance waterstops, crack injection, application of concrete repair materials
- Control of water inflows through leaking concrete structures, construction joints, expansion joints, rock fissures and shoring.
- Light-Weight Cellular Grout for annular space grouting and void backfilling
- Grout Mixing and Pumping Equipment for application of cement and chemical grouts
- Construction job site troubleshooting and training of contractor personnel for concrete repair and water control applications

**Selected Grouting Experience:**

**SOIL STABILIZATION - DEEPEXCAVATION**

Toronto, ON

Technical specialist on time-critical sealing of leaking quick sand through a caisson wall at a condo development site

**PRESSURE GROUTING - CONCRETE STRUCTURE**

Toronto, ON

Assisted general contractor at a new underground parking garage to overcome difficult ground conditions by pressure grouting in rock borehole.

WATERPROOFING

CRACK INJECTION

CONCRETE RESTORATION

SEWER REHABILITATION

WATER CUT-OFF

PRESSURE GROUTING

CEMENT GROUTING

SOIL STABILIZATION

**Jun Leyson Selected Grouting Resume**

**CONDUIT FILLING**

Toronto, ON

Worked as onsite grouting technician on a time-critical conduit filling project where sand and bentonite were placed around a high voltage cable within a 100 metre conduit.

**CASING FILL GROUTING**

Toronto, ON

Assisted electrical contractor to fill 110 metre casing that contained 6 high voltage electrical conduits with a high strength, flowable grout.

**VENT RAISE GROUTING**

Sudbury, ON

Provided on-site grouting service to reduce ground water permeability using microfine cement and high pressure cement grouting equipment.

**COLLECTOR SEWER GROUTING**

Hamilton, ON

Technical grouting specialist for a sewer and waterline contractor on a high volume water stop project using chemical grouts in a confined space.
